

ASTRON 331, Spring 2017– Problem Set 3

Due on May 2, in class.

Solve problems 1, 2, 3, 6, 7, and 8 at the end of chapter 3 in Maoz and problem 1.5 in Phillips. Each problem part is worth 1 point.

Note: Although this problem set is due after the midterm, all problems except 3.7 and 3.8 in Maoz are fair game for the midterm, so you should work on the problems before the midterm. You should also get started preparing the *handwritten* 8.5" \times 11" sheet of notes that you will be allowed to use for the midterm (you can write on both sides).
