

## Astrophysics Paper Review Form

Your name: \_\_\_\_\_

Paper author(s) and year: \_\_\_\_\_

Main result(s). If the paper contains many results, select the most important (no more than 3):

---

---

---

Key figure(s). If you had to select a *single* figure (for longer articles, perhaps two) to summarize the main results, what would it be?: \_\_\_\_\_

Summary of the method(s). Omit details. If the paper used a novel method, highlight it.: \_\_\_\_\_

---

---

---

Strengths and/or weaknesses. Relative to previous research, what did this article do better? Are there weaknesses that undermine the robustness or scope of the results?: \_\_\_\_\_

---

---

---

Open questions / next steps. Research articles usually do not completely settle the questions that motivated them, or raise new questions. Where would you take this research next? \_\_\_\_\_

---

---

---

What are other things that you would like to discuss? E.g., aspects of the paper that you found interesting but did not fully understand.: \_\_\_\_\_

---

---

---
